## Industry Memberships

## Company Development Direction

### Category

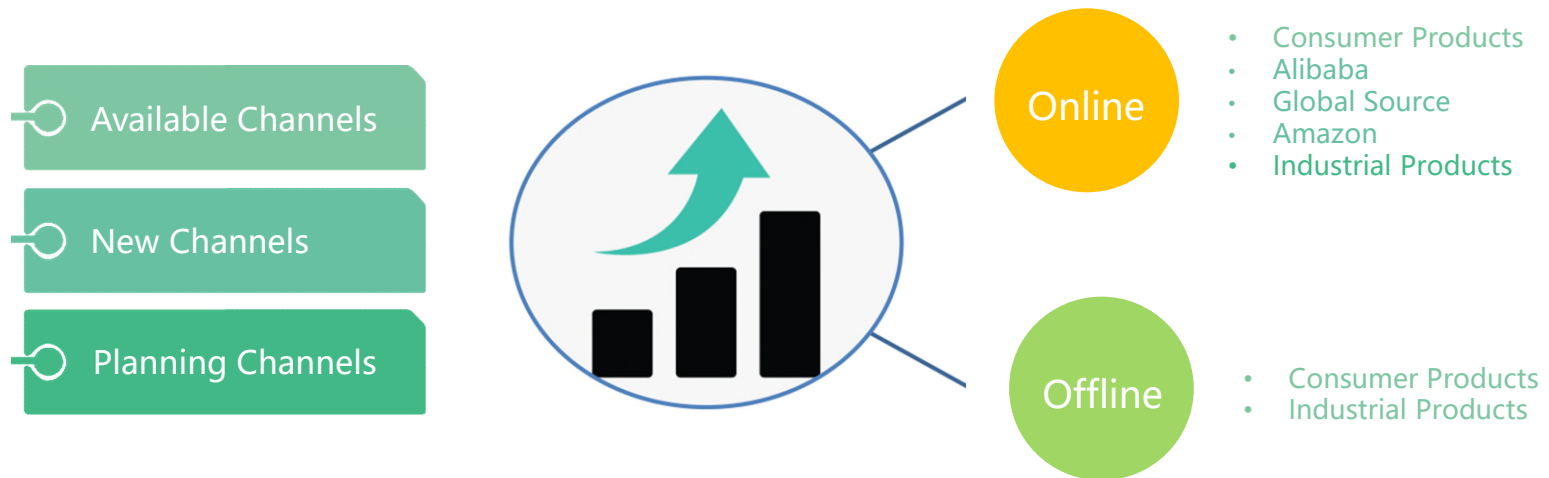

- Build software / firmware development team
- Reserve talents and technical base for entering new product categories
- Improve engineering technology capability and accelerate the conversion from OEM to ODM

- Set up independent company to operate e-commerce channel brand in Shenzhen
- Self-developed products based on engineering and manufacturing platforms
- Gradually add software / firmware enabled products

# Company Development Direction

|| Product category and Channels ||

\*Based on the existing consumer high-frequency products, gradually increase the share of industrial products

# Company Development Direction

## || Efficient production and Process Management ||

- Continue to promote lean production, both soft/hard saving are harvested
- Activate process optimization, solidify improvement results, and create a “mobile team”
- IT-enabled guidance for product development, market expansion, and management improvement
- Corporate culture building, creating an efficient atmosphere and sharpening a win-win concept
